BPMJ is the leading international journal devoted to publishing articles that provide insight into the management and best practices of key business processes. It does this by staying at the leading edge of theoretical advances in the field, and illustrates the practical relevance of these through case studies and applied examples. The journal helps to build a deep appreciation of how to manage business processes through critical evaluations of the experience of others.

BPMJ is published six times a year. Interested readers may subscribe by going to the publisher's website. Readers may also go to the Emerald site and buy and download specific articles. BPTrends will publish the Table of Contents of BPMJ each time BPMJ is published to allow BPTrends readers to determine if there are articles they should read.
